

LUMINEERS

Enhance your smile with Lumineers! Stained or discolored teeth can be a major embarrassment, and Lumineers with Dr. Mia can provide another way to restore or maintain your white teeth through a non-invasive and painless procedure. Created and patented by LUMINEERS Smile Design Studio, they are an innovation to traditional veneers. Compared to traditional porcelain veneers, Lumineers are contact lens thin and placed directly over the teeth, minimizing the need to remove of any sensitive tooth structure; which is safe and convenient for patients with sensitive teeth.

Lumineers provide beauty and strength to your teeth. They offer the perfect aesthetic solution for your teeth to mask stains, fix chipped or cracked teeth, and close gaps. Made from patented Cerinate porcelain, Lumineers are so durable that they are highly resistant to chipping or staining and are clinically proven to maintain their exuberance and sparkle for many years.

If you're considering options for a safe and advanced way to get the white smile of your dreams, Lumineers can be the perfect solution. We can show you what your ideal smile could look like within 15-20 minutes using our Lumismile Smile Design Studio. Call Smiles by Mia at (703) 323-1300 to schedule a free Lumineers consultation and see a picture of what your ideal smile could look like today!
